

RIT PRESS SYSTEM (Pre-Rigged Escape Safety System)

This system offers our versatile Class II harness made of Kevlar or Nylon, integrated with the RIT Fire Rated Egress System. This pre-rigged system is UL Certified to the NFPA 1983-2006 Standards on Life Safety Rope and Equipment for Emergency Services. The Class II harness can additionally be rigged with a ladder hook allowing for positioning, ladder and truck work. PRESS is the original pre-rigged escape safety system, dating back to 1998 when the FFRED rescue system was invented. This concept has been RIT Rescue and Escape Systems focus to improve firefighter safety. Emergency egress should be 100% pre-rigged to the harness, escape line and descending device. RIT revolutionized the pre-rigged concept for emergency egress and offers the system in more configurations than any other manufacturer. Our class II harness has proven itself to be a flexible and durable solution for various applications involving firefighter safety. RIT incorporated pre-rigged egress to this harness several years ago, but the concept has not caught on until now. Unfortunate circumstances have created a need and demand for a class II pre-rigged escape safety system

- Escape line options: 3/8 tubular webbing or 8mm Kevlar rope
- Descender options: RIT's F.I.R.E descender or CMC Escape Artist
- Anchor options: RIT's auto locking carabiner or Crosby 360 hook
- CERTIFIED TO: NFPA 1983, STANDARD ON LIFE SAFETY ROPE AND EQUIPMENT FOR EMERGENCY SERVICES, 2006 EDITION
